Subject: HGU Hydrogen Generation Units in Gdańsk Refinery – Grupa LOTOS S.A

Dear Sirs,

Grupa Lotos embarked on a large Refinery upgrade program in 2007. The 10+ Programme is a strategic investment task performed by Grupa LOTOS S.A. within the development of the refinery in Gdansk. In terms of scale and value, it is one of the largest projects in CEE economies' until 2010.

Lurgi is delighted to have delivered, in less than 29 months the new H₂ unit. The plant designed and built on an EPC (Engineering, Procurement, Construction) basis, went on stream in the last days of October and bring an additional 7 T/h of H₂ capacity to the site.

The Hydrogen unit achieved Ready for Start-Up status 3 days before contractual date. This success was resulted also from our good cooperation as well as your professional services.

Therefore, Lurgi would like to thank you for all the efforts and work performed by your Company related to this project.

We hope that our cooperation in the future will be successful for all the parties.

Kind regards

Jan Sadowski
Project Director
Head of Operations Department

Kind regards

Tomasz Samek
Executive Director
Head of Procurement Department
